

Post catheterization sims questionnaire

Complete the questions as a review of the catheterization Sims.

* Required

* This form will record your name, please fill your name.

1

It is 12:00 and Anne Simson is Post op day 1 of a hysterectomy.

She has not voided since the removal of her urinary catheter at 7:00. The doctor has prescribed the reinsertion of the catheter.

List 5 interventions you can attempt to promote bladder elimination before putting the catheter back in.

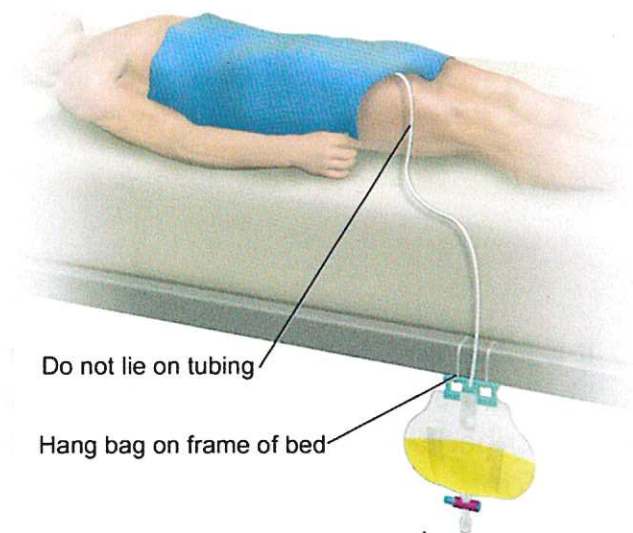

2

What information / data will you gather before informing the nurse that the patient has not voided?
List 5.

3

Closed Urinary Drainage

List the required material to insert a urinary catheter in Anne Simson.

4

After inserting a Foley catheter # 14 French, 375 ml dark yellow urine is drained.
Write out your charting below using the DAR method.

5

Anne Simson is complaining of pain.
What data should be obtained before administering the medication acetaminophen to this patient?

6

Acetaminophen's drug classifications are:

- ☐ anti-inflammatory and antipyretic
- ☐ antipyretic and antibiotic
- ☐ antipyretic and analgesic
- ☐ Analgesic and antibiotic

7

List 3 side effects of this medication.

8

List 3 patient teachings to go with administering acetaminophen for pain.

9

Considering Mrs. Simson is post-op of a hysterectomy, determine 3 unmet needs according to V. Henderson and consider 2 nursing interventions for each.

10

On a scale of 1 (extreme dislike) to 5 (extreme like :)), rate how you liked this first Sims "attempt" *
